<p style="text-align: center;">Narrative Product Description</p>	<p>BASCOM is a software development company specializing in Linux-based thin server and content management applications. Since its inception, BASCOM has made next generation security, connectivity and content management technology available for small to mid-sized networks and K-12 Schools, offering a pioneering approach to simple, affordable, low-maintenance deployment. (See BASOM 1.3)</p>	<p>This questionnaire is predisposed to the belief that all solutions to inappropriate Internet material have been identified. The approach that we are presenting is not one of these identified methods. Thus the profile of our approach to this problem generated by this matrix will be flawed. Please include the attached paper on Chaperon in your evaluation to our solution. (See Chaperon)</p> <p>Our product filters, however it compensates for filter's shortcomings by notifying administrators of possible filter issues. This brings humans into the loop allowing a human to make the appropriate/inappropriate material decision instead of leaving it up to a computer. (See Chaperon 2000 1.3)</p>

<p style="text-align: center;">Narrative Product Description</p>	<p>Digimarc patented digital watermarking solutions embed imperceptible information within images. Digimarc has - in an attempt to make the Internet a safer place for children - offered to license its watermark reading technology to filtering and browser vendors at no charge to help filter unwanted adult content on the Web and has offered to provide content distributors with a unique ID - that Digimarc will make publicly available - to easily embed Adult Flag watermarks in images that may be potentially harmful to children. Digimarc's watermark reading technology can be integrated by browser and filtering applications to detect and filter images watermarked with an Adult Flag, according to user preferences. The Adult Flag can be embedded in images using one of the millions of copies of Digimarc-enabled imaging tools that they are already in the market and are widely used to prepare images for the Web (including applications from leading vendors of digital imaging and asset management applications like Adobe, Corel, Cerious Software, CreativePro, Datamark, Equilibrium, Jasc Software, Micrografx, TrueSpectra, Ulead, and Xat.com). 	Digimarc Corporation	Dotsafe, Inc.
17. If your product has received a third party evaluation, validation, or endorsement, please identify the organization that provided it and submit documentation showing the third party's evaluation of your product.	Our products have been reviewed and adopted as the <i>de facto</i> standard for watermarking images across the industry, but have not been previously submitted as technology for this filtering purpose.	
18. Which of the following best describes your company?		
a. Single location		
b. Multiple locations, all company owned	P	P
c. Multiple locations, all franchised		
d. Multiple locations, mixture of company and franchise owned		
19. What is the initial cost to use your product? Please indicate whether this is a one time fee, or a monthly charge.		Free
	There is no initial or monthly cost associated with the Adult Flag Digimarc watermarking solution. As a public service, Digimarc will waive the SDK (Software Developer's Kit) license fee to allow Internet filtering and browser application vendors to integrate Digimarc watermark reading software to complement their existing filtering solutions. Using Digimarc embedders bundled within millions of copies of Digimarc-enabled imaging and asset management applications already in distribution around the world, content providers can easily watermark their images with the Adult Flag and a unique Digimarc ID that Digimarc will make widely available to content providers to allow them to mark their content as inappropriate for minors.

<p>17. If your product has received a third party evaluation, validation, or endorsement, please identify the organization that provided it and submit documentation showing the third party's evaluation of your product.</p>	<p>N2H2</p>
	<p>We have yet to see a comprehensive, scientific comparison test done between filtering products to date by any third party. Our new customers, such as a school district generally has had a poor experience with another product or evaluates N2H2 filtering services against 1-3 other options prior to purchasing service from N2H2.</p>
<p>18. Which of the following best describes your company?</p>	
<p>a. Single location</p>	
<p>b. Multiple locations, all company owned</p>	<p>P</p>
<p>c. Multiple locations, all franchised</p>	
<p>d. Multiple locations, mixture of company and franchise owned</p>	
<p>19. What is the initial cost to use your product? Please indicate whether this is a one time fee, or a monthly charge.</p>	<p>A one time set up fee is charged to establish N2H2 hardware on a customer's network, then a per user or per workstation fee is charged. Schools have the option of selecting a sponsor supported version of our service that has no recurring fees for the schools. A majority of school districts opt for the sponsored model, those who do not pay approximately \$1 per student per year. Corporate Networks pricing varies widely based on the size and capacity of their corporate networks. Home Users have the cost of filtering bundled with their ISP fees. The ISP sets the pricing policies; often the service is free, sometime a fee of \$1-3 per month is charged.</p>
